

Summer visiting program Pekin University

Program Details

The Summer Visiting Program of Ecole Polytechnique is an opportunity for outstanding undergraduate students from the departments of Mathematics and physics of Pekin university, interested in applying for « Cycle d'ingénieur programme of Ecole polytechnique ».

Ecole Polytechnique invites the students to come and discover the scientific environment in France, and to discover the quality of teaching and research of one of oldest institution and premier center for science, technology and applied sciences.

Students will also visit laboratories and meet Ecole Polytechnique faculty, and they will participate a special and unique training to help preparing the entrance exam of Ecole Polytechnique.

Budget

Ecole Polytechnique will take in charge the international flight.

Ecole Polytechnique will arrange accommodation on the campus. The accommodation will be in charge of Ecole Polytechnique.

Ecole Polytechnique will also take in charge the cultural activities organized.

Social and Cultural Activities

To enrich the learning experience, students will be invited to participate in social and cultural activities both on and off campus such as visits of Museum in Paris. The social activities on campus will be led by the students of Ecole Polytechnique. The students will also meet with the alumni network of Pekin University in France.

The students will also have the unique opportunity to accompany the students of Ecole Polytechnique to watch the military parade of Bastille Day.
