

Uppsala University

Swedish nature

Nature and environment on Gotland

Dates

July 24th – August 6, 2017

Place

Klubban and Erken field station
Visby, Isle of Gotland, Uppsala University, Sweden

Responsible departments

Biology Education Center

Aim

In an international setting, the students will be trained in basic field techniques and will be exposed to current relevant biology research at Uppsala University.

Course description

The course will give an overview of Swedish ecosystems and their natural history, including the effects of climate, history, geology and human impact. After the course the student should be able to

- describe important groups of organisms and prominent species in terrestrial and aquatic ecosystems, and their adaptations
- explain in basic terms how these ecosystems are structured and affected by climate, physical factors and human impact
- apply basic field techniques to assess diversity and abundance

Practical information

The students will be greeted at the airport of Arlanda, a close distance to the safe, old and beautiful city of in Uppsala. Students are offered comfortable housing in the small city where it is easy to move around by bicycle, by bus or by walking. The climate is comfortable and the environment; including air and water, is clean. The students will be introduced to the course and the field stations of Uppsala University. Before returning home, the students will have the possibility to visit the capital of Sweden, Stockholm.

Prerequisites

Admitted to Bachelor studies in biology or similar.

Price

The course fee is 25 000 RMB and include travels, accommodation and food during the field part of the course.
